April 9, 2015

Crescent City Pharmacy is committed to ensuring every child get's the nutrients they need to grow and thrive. Receiving vitamins on a daily basis promotes growth, protects against certain diseases, and provides proper metabolism. The commitment to the community is why Crescent City Pharmacy is proud to be the first and only pharmacy in the Central City Community to introduce Healthy Kids, a FREE program that gives children ages 4-10, a FREE monthly supply of children's chewable multivitamins.

Maintaining a well-balanced diet full of the required daily vitamins allows children to receive the proper nutrients needed to stay healthy and disease free. Unfortunately, children may not eat the many vegetables and fruits needed to maintain a proper nutrition. In addition, eating healthy can be very costly, which has led to a society that is dependent on fast food and quick, easy meals. Vitamins are really the best and easiest way to reverse this cycle.

By starting with our children, we hope to encourage proper nutrition at an early age. Helping kids stay healthy can better prepare them to battle common illnesses during the school year as well as promoting good eye sight increased concentration , and athletic success! So stop by to sign up your children today. Receive your free vitamin now. Good healthy REALLY is just around the corner....

Sincerely,

Lishunda Franklin, PharmD
